

PRO RAIN

sales arguments for PRORAIN

a comparison with our competitors

Technical details	Customer value
Complete hot dip galvanized hose reel, turntable and chassis	<i>Very stable in value due to optimum corrosion protection</i>
Fully closed inner reel drum with precision manufactured side plates in appealing design	<i>the first layer of the PE pipe sits solidly on the drum and no distortion or grooves due to uneven layers are created. This is a great advantage to "rail reel drums" that can lead to fractures and thus shorter life span</i>
Warp resistant and stable chassis	<i>made of high-strength beams to assure sufficient stability even under difficult operating conditions</i>
High-quality special PE-pipe	<i>for longer life span even under high requirements (up to my 0,7 - this is up to 30% more compared to our competitors)</i>
Drive via stable sprocket with large diameter	<i>results in uniform distribution of forces for the entire periphery</i>
Reel sheathing removable	<i>for easy access for service works</i>
Revolving pipe reel	<i>can be adjusted in every working position</i>
Sturdy hydraulic machine supports	<i>easy to handle, Optimum stabilisation, when lifting the cart great ground clearance for transportation on the road</i>
4-speed gearbox / turbine combination	<i>easy to handle, precise control for exact precipitation rates</i>
Electronic control via ECOSTAR 4000S	<i>well proven irrigation computer, easy to handle, provides exact demand of required precipitation rate</i>
Combi - wheel cart with adjustable track width and wide tires	<i>optimum adjustment to different cultures; high crop clearance for high growing crops</i>
Pendulum equalizer	<i>for gentle irrigation at the end of the strips and for uneven terrain</i>
Automatic cart lift	<i>at the end of the irrigated strip the cart is lifted automatically into the transport position</i>
